GATE VALVES  
LIMITED

*robust  
accessible  
lasting*

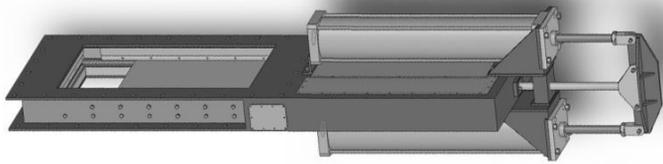

## *Heavy Duty Dry Process Gate Valves*

Isolation Gate Valves to provide, operational and emergency seals on boiler and kiln feed lines or product feed control and interrupt in high temperature and/or abrasive product applications.

The 760mm Double Gate Valve below has provided trouble free operation on a kiln feed application for 8 years at 60,000 cycles per year.

Silo isolation gate valves of compact design and long life. Spectacle style gates for product control available to suit application.

Cast Iron for strength

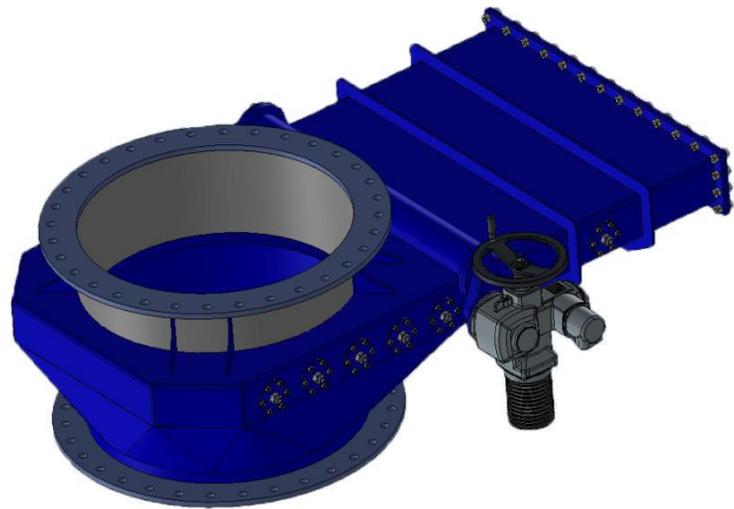

Cast High Nickel Alloys for high temperatures

High Chrome Irons for abrasion resistance.

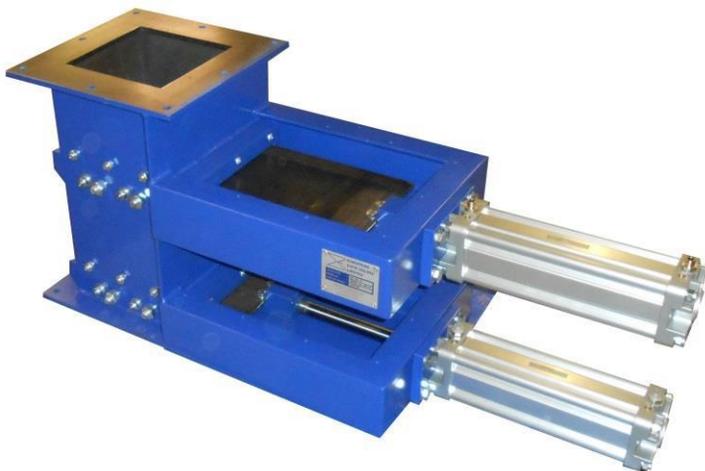

Fabricated construction in Carbon and Stainless Steels

Control and monitoring with Mini-PLC.

Gate position indication through mounted contact limit switches, non-contact proximity switches, cylinder mounted reed switches. Air swept slides, purged seals and bonnets. Refractory Lining, Heat Shields, Water Cooling  
Manual, Pneumatic, Electric or Hydraulic actuation

Custom designs available in a wide range of sizes to suit specific applications and process requirements. Flange configuration to suit and accessories supplied to ensure full integration with the process and control equipment.
